## PROJECTS

### Registration Page — Using HTML,CSS,JavaScript Code

- Developed the “Registration Page”, which is structured using HTML5. It includes essential elements such as input fields for user’s name,email,password and date of birth. Additionally, a checkbox is provided to accept the terms and conditions.
- The internal CSS is used to style the webpage by defining fonts,colors, layouts and element-specific properties, creating a visually appealing and structured registration form.
- The JavaScript is utilized to handle form submission, validate user input and display user entries dynamically on the webpage.
